Dear Urban Data Lab team,

I am applying for the paid summer research internship advertised on your website. I am halfway through an MSc in Data Science in Bergen and I am looking for a project where the data has a direct public policy use.

Last spring I built an open access dashboard of bus stop accessibility for the Bergen municipality. It taught me how much of geospatial work is spent reconciling registries written by different offices. I would like to bring that experience to the parcel level land registry work your lab has published on.

I can start on 15 June 2027 and I am able to work on site in Northgate for the full twelve weeks.

Kind regards,
Jonas Halvorsen
