NORTHGATE UNIVERSITY
URBAN DATA LAB

JOB DESCRIPTION - RESEARCH ANALYST (fixed term, 24 months)

Purpose
Support the lab’s programme of work on land registries and housing supply. The analyst maintains the parcel level data pipeline and prepares the quarterly reporting for the funder.

Responsibilities
1. Maintain and document the parcel level land use dataset.
2. Reconcile municipal registries and produce provenance notes.
3. Prepare quarterly reports and the annual open data release.
4. Contribute to peer reviewed publications.

Requirements
MSc in a quantitative social science, geography or data science.
Two years of experience with geospatial data processing.
Fluency in Python and SQL.

Terms
Salary scale 11, full time, 24 months, based at Northgate University.
Closing date for applications: 20 November 2026.
